HYDRAZZO®

Polished Marble Pool Finish

AQUAVATIONS
Hydrazzo® LUXURIOUS MARBLE POOL FINISH

Hydrazzo® combines naturally beautiful coarse graded crystalline and colored marble, along with white Portland cement and a variety of other performance-enhancing ingredients to create the ultimate pool coating. As a result of polishing — the final application step — this silky smooth, luxurious surface provides unmatched durability and resistance to etching, topical stains, permanent scale and algae adhesion. Available in fourteen colors, Hydrazzo® will bring elegance to your residential or commercial project.

Actual water color and finishes may differ from printed samples. Water color is influenced by depth, surrounding landscapes and buildings, as well as the angle of the sunlight, time of day and time of year.
